

Give yourself the peace of mind of advanced data protection.

There's almost nothing as important as protecting your customer and employee data from cybercriminals. Windows 11 Pro gives you cutting-edge safety features that can help you secure your data, and running Windows 11 on a modern Lenovo device can make sure you get the most out of these next-generation safety features.

Keep your data safe with Windows 11 Pro.

As tech gets better, so does cybercrime. Stay ahead of the bad guys with Windows 11 Pro. Its next-generation security features are designed to assess and neutralize cyberthreats before they become a problem.

Microsoft Zero Trust Technology:
The Zero Trust model assumes there's been a breach and verifies each request for customer or employee data. Better safe than sorry.

Smart App Control:
This major enhancement to the Windows 11 security model default blocks users from running malicious applications that are untrusted or unsigned.

Hypervisor-Protected Code Integrity (HVCI):
This prevents attackers from injecting their own malicious code and helps ensure that all drivers loaded onto the OS are from a signed and trustworthy place.

Gen 1 ThinkPad X13 Yoga: The mobile flexibility you need

- Flexible 13.3" 2-in-1 business laptop
- Thin, light and powerful
- 4 flexible modes: laptop, tablet, stand, and tent
- Perfect for the on-the-go or at home professional

Now's the time to upgrade. Contact Lenovo to discuss next steps.

You don't want to wait until the current Windows 11 is phased out. Plus, having your employees on older devices puts both them and you at a greater risk from security breaches. Upgrade now and discover the enhanced security protections that come with running Windows 11 Pro on a newer Lenovo device.

Don't miss the Lenovo videos that turn it up to 11!

Got a minute? Then check out how Lenovo + Windows 11 Pro are an even better combo than earphones and chair pillows for helping your employees stay productive at work.
